Targeting in one year, become a junior backend developer and learn more about technology

EDUCATION

Ho Chi Minh city University of Technology

Sep 2011 - Nov 213

Electrical - Electronic Engineering

TECHNICAL SKILLS

Programming Language:	Python, C/C++, SQL, Javascript
Software & Tools:	Backend: Django, Flask
	Database: PostgreSQL
	Editor: neovim
	VCS: Git
	Others: Spreadsheet, Pandas(basic)

PROJECTS (ALL AVAILABLE IN GITHUB)

ssg

- I have a small blog which is hosted on github, so I decided to make a tool to render static blog(HTML, CSS and Javascript only) for myself.
- This tool using Python and it's libraries like Jinja2, markdown2,...
- I've published it at myssg.

ecommerce

- This is my effort to make an e-commerce website with Flask framework and it's plugins.
- The components of website include manage users, products, checkout cart.
- Frontend uses Jinja2 template and tailwindcss.
- I'm trying to dockerize this webapp.
- More about project at ecommerce.

python-orders-collector

- In the past, I worked at GHN as an operation staff. My responsibility is tracking the operation's KPI of the warehouse. So I decided to make a bot on the company chatting platform(Telegram) to automate my workflow.
- This tool using Flask framework and Telegram's api for make some bot functions. Moreover, this project associates with another tool call backlog-exporter.
- The project stored at python-orders-collector-bot.

WORK EXPERIENCE

- In the past, I worked at some logistic companies as an Operation Executive staff. Even though the job has no relation with coding, but I was trying to combine with it. I've made some pet project to support my workflow better.
- Currently, I am a self-taught developer. I have no working experience in software development. But I hope that I will get a job in this field, because I love coding.

PASTIMES AND ACTIVITIES

- After coding, I like to read books, blogs or reddit's programming threads.
- I would like to learn new programming language like Rust or Golang. I also want to learn more about math, data structures and algorithms.
